DETAILED ACTION

Information Disclosure Statement

1. The alleged attached Form PTO 1449 to information disclosure statement filed 6/17/2004 is not found in the case. Hence, the information referred to therein has not been considered. Please resubmit the Form PTO 1449.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-22 are rejected under 35 U.S.C. 102(e) as being anticipated by Sumner et al. (Sumner), U.S. Patent Application Pub.No. 2003/0142641.

Regarding claims 1-22, Sumner discloses a method for detecting unauthorized use of a wireless local area network having at least one mobile unit that communicates with at least one access point, comprising: accumulating first network traffic data at a mobile unit; accumulating second network traffic data at an access point; communicating said first and second traffic data to a computer; and correlating said first and second traffic data in said computer to identify non-correlated traffic data and

Art Unit: 2686

signaling an alarm condition when said non-correlated traffic exceeds a threshold portion of said traffic data (page 3-4 {0037-0041}).

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-20 and 22 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-22 of copending US Patent Application Publication No. 2005/0136891, hereafter '0136891. Although the conflicting claims are not identical, they are not patentably distinct from each other because '0136891 encompasses the scope of claims 1-20 and 22 of the instant application.

The instant application generally claims a method and system for detecting unauthorized users of a wireless local area network. '0136891 claims similar limitations except "correlating said first and second traffic data....to identify non-correlated traffic data". However, '0136891 claims "comparing said source location to a corresponding

Art Unit: 2686

location in said database", which is analogous to the instant application. The first and second traffic data in '0136891 is labeled location data and location of source.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Omission of element and its function in combination is obvious expedient if remaining elements perform same function as before. In re KARLSON (CCPA) 136 USPQ 184 (1963).
